# Generate Faces

审阅

代码审阅

HISTORY

## Meets Specifications

Congratulations on completing this project! You did a great job on the face generation project! Since I did the second review for your project, so I didn't repeat the same parts. Still, I'd like to suggest you watch this [document](#). It has some great advice to improve DCGANs performance.

Good luck with the Nanodegree and happy for you that you finished all the projects! For the next step, all I want to say and wish is: Do Keep Learning and Good Luck 🌻🌻🌻

### 项目中是否有需要的文件、相关函数是否通过了单元测试

该项目提交应包含项目中名为“dlnd\_face\_generation.ipynb”的.ipynb文件。

项目中所有的单元测试都已通过。

### 建立神经网络

`model_inputs` 函数被正确实现。

`discriminator` 函数被正确实现。

Great job on updating the discriminator's implementation!

`generator` 函数被正确实现。

`model_loss` 函数被正确实现。

`model_opt` 函数被正确实现。

## 神经网络训练

训练函数被正确实现。

- 它应使用 `model_inputs`、`model_loss` 及 `model_opt` 创建了模型。
- 同时它使用 `show_generator_output` 函数展示了 `generator` 的输出。

Great job on normalizing the input to Discriminator!

这些超参数被设置到了合理的数值。

Very good job on the fine tuning the the parameters!

项目代码生成的面部图像比较逼真，至少看上去像是一些人脸。

Impressive results, great!
